(c) Before final action is taken by the city or any department thereof on the location and design of the any public building, statue, memorial, park, parkway, boulevard, street, alley, playground, alley, or grade thereof, the question shall first be submitted to the planning and zoning commission for review and report.

(d) All plans, plats, or replats of land laid out in lots or blocks and the streets, alleys, or other portions of the same intended to be dedicated to the public or for private use within the corporate limits of the city, shall first be submitted to the planning and zoning commission for its approval or rejection. Before such plans, plats or replats shall be entitled to be recorded in the office

THE VILLAGE CITY CODE

of the county clerk they shall be approved by the city council. It shall be unlawful to offer and cause to be recorded any such plan, plat, or replat in any public office unless the same shall bear thereon, by endorsement or otherwise, the approval of the city council. Any plat filed without the endorsed approval of the city council shall not import notice nor impose any obligation or duties on the city. The disapproval of any such plan, plat, or replat by the city council shall be deemed a refusal of the proposed dedication thereon.

(e) The planning and zoning commission may exercise jurisdiction over subdivision of land and adopt regulations governing the subdivision of land within its jurisdiction. Any regulations, before they become effective, shall be approved by the city council and shall be published as provided by law or ordinances. Such regulations may include provision as to the extent to which street and other ways shall be graded and improved and to which water, sewer, and other utility mains, piping, or other facilities shall be installed as a condition precedent to the approval of the plat. The regulations may provide for a tentative approval of the plat before such installation. Any such tentative approval shall be revocable for failure to comply with commitments upon which the tentative approval was based and shall not be entered on the plat. In lieu of the completion of any improvements or utilities prior to the final approval of the plat, the commission may accept an adequate bond with surety, satisfactory to the commission, to secure for the city the actual construction and installation of the improvements or utilities at a time and according to specifications fixed by or in accordance with the regulations of the commission, and further conditioned that the developer will pay for all material and labor relating to the construction of the improvements. The city may enforce said bond by all appropriate legal and equitable remedies. Nothing in this section shall be construed as granting the city or planning and zoning commission the power to direct any public utility to extend its services to any particular area.

(f) Whenever one (1) or more main buildings are proposed to be located in a cluster or grouping which has a different arrangement, orientation, or other site planning variation from that of other buildings, structures, or uses in the area or on adjacent properties, the architectural design, location, orientation, service, and parking areas of such buildings shall be planned so as not to adversely affect the use of adjacent or other properties in the area, as determined by the city council after receiving a report and recommendation from the planning and zoning commission.

(g) All plans for the new construction of or addition to any building, classified by the International Building Code for use or occupancy as assembly,

THE VILLAGE CITY CODE

business, educational, institutional, mercantile, or any combination thereof, shall be submitted to the planning and zoning commission for review and recommendation. All such recommendations must be submitted to the city council for final approval.

(Code 1976, §§12-1-2, 12-1-3, 12-1-4, 12-1-6, 12-6-2; Ord. No. 505, §2, 9-20-94)
State law reference--planning and zoning commission generally, 11 O.S. § 45-103, 45-104.

Sec. 24-25. Specific use permits-List of uses- Conditions for use of land.

1. As used in this chapter "specific use permit" means a permit granted by the City Council, after notice and a hearing and preliminary review and recommendation of the Planning & Zoning Commission, for a specific use within any zoning district.
2. Each zoning district in which specific use permits are permitted contains a list of uses, which have been determined to more intensely dominate the area in which they are to be located or their effects on the general public are broader in scope than other types of uses, which are permitted in the zoning district. A property owner with a use enumerated on the list may, by application for a specific use permit, locate in a zoning district for which such use would not normally be allowed or could be allowed, but due to its potential impact on surrounding properties, must secure a specific use permit.
3. The types of uses for which a specific use permit may be required are those types of uses which, because of the size of the land they require or the specialized nature of the use, may more intensely dominate the area in which they are located and their effects on the general public are broader in scope than other uses permitted in the district.
4. The designation of a specific use as possible on the specific use list shall not constitute an authorization or an assurance that such use will be permitted. Rather, each specific use permit application shall be viewed as to its probable effect on the adjacent properties and community welfare and may be approved or denied as the findings indicate appropriate.
5. In granting a specific use permit, the City Council may require conditions related to the use of land, including, but not limited to, permitted uses, lot sizes, setback, height limits, required facilities, buffers, open space areas, lighting, signage, landscaping, parking and loading, compatibility, land use

THE VILLAGE CITY CODE

density and such other development standards and operational conditions and safeguards as are indicated to be important to the welfare and protection of adjacent property and the community as a whole. This may include having the property platted and/or the requirement of the dedication of sufficient right-of-way or easement as necessary to further the public good. Such conditions shall be determined in accordance with the regulations specified in the zoning ordinance. The conditions need not be uniform with regard to each type of land use if equitable procedures recognizing due process principles and avoiding arbitrary decisions have been followed in making regulatory decisions.

(Ord. No. 596, §3, 10-19-2004). State law reference, --Title 11, § 43-101 et seq.

Sec. 24-26. Application, review, public hearing.

1. The owner of any property within the corporate limits of the City, or a representative of such owner, may make application for a specific use permit for property in a zoning district where specific use permits have been authorized. The application shall be made on forms provided by the zoning administrator and shall be accompanied by an application fee established by resolution of the City Council. The applicant shall be required to submit a preliminary site plan and a certified list of property owners within three hundred feet of the subject property as listed on the current property tax rolls.
2. As used in this section, "site plan" means the documents and plans specified in the application form, which are needed to ensure that a proposed land use or activity is in compliance with city ordinances and applicable state and federal regulations, if any.
3. The zoning administrator shall review the application for eligibility and completeness. Upon making a determination that all required information has been provided and that the application is eligible for further consideration, the zoning administrator shall schedule the application for public hearing before the Planning & Zoning Commission. Said hearing shall be held within sixty (60) days of receipt of the completed application. An incomplete application, or any application for a specific use which is not specifically enumerated for the subject zoning district, or which is not consistent with applicable city ordinance, state law, or federal law may be denied by the zoning administrator.

THE VILLAGE CITY CODE

4. Notification of the public hearing shall be given by mail in the same manner as required by Section 43-106 of Title 11 of the Oklahoma Statutes for public hearings on proposed zoning changes. Within a reasonable time following the public hearing, the City Council may deny the request, approve the request, or approve the request with conditions.
5. Reasonable conditions may be required in conjunction with the approval of a specific use permit. Conditions imposed shall meet the following requirements:
 - a. Be designed to take into consideration the natural environment, the health, safety, and welfare of the residents and landowners immediately adjacent to the proposed land use or activity, and the community as a whole;
 - b. Be related to the valid exercise of police power, and to the proposed use or activity;
 - c. Be necessary to meet the intent and purpose of zoning requirements;
 - d. Be related to the standards established for the land use or activity under consideration; and
 - e. Be necessary to ensure compliance with those standards.
6. The conditions imposed with respect to the approval of a specific use permit shall be stated in the record of the approval actions, and shall not be changed or amended except as expressly authorized by resolution of the City Council, with notice. The City Clerk shall maintain a record of conditions, which are changed.
7. A specific use permit shall become void if the use ceases for sixty (60) consecutive days or if the use does not commence within six (6) months after the granting of the specific use permit.
8. A specific use permit shall not be transferred to a new property owner without the approval of the City Council.
9. Requests for specific use permits or other rezoning requests that have been denied by the City Council will not be again scheduled for a

THE VILLAGE CITY CODE

hearing within six (6) months of the date of such decision. A new application must be filed, and hearing before the Planning & Zoning Commission and City Council, if required, will not be granted unless the applicant can show material change in the situation or where new evidence, which might affect the decision, can be produced. Motions for rehearing will not be entertained. A request that is withdrawn prior to a decision thereon by the city council shall not be re-filed or heard within six (6) months of the date of such withdrawal.

(Code 1976, §12-1-17; Ord. No. 596, §3, 10-19-2004) State law reference, -- Title 11, § 43-101 et seq.

Sec. 24-27. Lot splits.

(a) The division of any lot that is recorded as part of an official plat in the city into two or more lots shall first be submitted to the planning and zoning commission for review and report.

(b) No lot shall be split unless all of the individual lots resulting from the split meet all of the requirements of this chapter in addition to all applicable subdivision regulations of the city.

(c) A lot split shall be required in the following instances:

(1) Whenever a legally platted lot under single ownership is to be divided for the purpose of the sale of a portion of the legally platted lot to another owner;

(2) Whenever two (2) or more main buildings are proposed to be located in a cluster or grouping which has a different arrangement, orientation, or other site planning variation from that of other buildings, structures, or uses in the area or on adjacent properties and where the division of the property into separate lots is deemed necessary by the building inspector to determine the open space, lot area, frontage, or off-street parking area required for any use, main building, accessory building, or accessory use thereto.

(d) Final approval for any lot split shall be by the city council.

(e) All approved lot splits shall be filed and recorded in the office of the County Registrar of Deeds by the applicant.

(2) To hear and decide special exceptions to the terms of this chapter to allow a use, or a specifically designated element associated with a use, which is not permitted by right in a particular district because of potential adverse effect, but which if controlled in the particular instance as to its relationship to the neighborhood and to the general welfare, may be permitted by the board of adjustment, where specifically authorized by this chapter, and in accordance with the substantive and procedural standards of this chapter;

(3) To authorize in specific cases variances from the terms, standards and criteria that pertain to an allowed use category within a zoning district as authorized by this chapter when such cases are shown not to be contrary to the public interest if, owing to special conditions, a literal enforcement of the provisions of this chapter will result in unnecessary hardship, and so that the spirit of this chapter shall be observed and substantial justice done; provided, however, the board shall have no power to authorize variance as to use except as provided by paragraph (4) of this section.

Said recommendations shall be submitted to the city council, which shall stipulate the requirements, which shall be followed to comply with the intent of this chapter, and said requirements shall be made a part of the conditions for issuance of the permit authorizing construction and occupancy.

DIVISION 4.

PLANNED UNIT DEVELOPMENTS

Sec. 24-200. Scope and Intent.

(a) This division applies to the PUD Planned Unit Development Districts.

(b) It is the intent of this division to establish planned unit development requirements and procedures, which permit flexibility in the regulation of land development; encourage innovation in land use and variety in design, layout and type of structures constructed; achieve efficiency in the use of land, natural resources, energy and the providing of public services and utilities; encourage useful open space; and provide better housing, employment and shopping opportunities particularly suited to the needs of the residents of the city.

(c) Within a designated planned unit development, conditions relating to the use of land, including but not limited to, permitted uses, lot sizes, setbacks, height limits, required facilities, buffers, open space areas, lighting, signage, landscaping, parking and loading, compatibility and land use density shall be determined in accordance with the planned unit development regulations contained in this division. The planned unit development conditions need not be uniform with regard to each type of land use if equitable procedures recognizing due process principles and avoiding arbitrary decisions have been followed in making regulatory decisions.

State law reference--Similar provisions 11 O.S. §43-110

(Ord. No. 505, §2, 9-20-94)

Sec. 24-203. Design standards.

(1) The proposed PUD shall be designed to provide for the unified development of the area in accordance with the spirit and purpose of the land uses and zoning districts adjacent to it.

(2) Design of the PUD may provide for modification of conventional zoning ordinance requirements for such elements as yard areas, densities, setback, height, lot coverage, landscaping and off-street parking. (Ord. No. 639, §1, 03-17-2009)

(3) The minimum size of the site on which a PUD shall be located shall not be less than four (4) standard-size residential lots of at least seven thousand two hundred square feet each for residential developments.

(4) Building codes and other related city code development requirements shall not be reduced in the design of a PUD.

(Ord. No. 401, §1, 1-19-88; 2014 City Code)

Sec. 24-204. Minimum design and construction standards for streets and alleys.

Streets and alleys for a PUD shall be designed and constructed in accordance with city standards and specifications for right-of-way width and paving cross section; provided that modifications may be requested and approved as a part of the master plan if the following criteria are met:

THE VILLAGE CITY CODE

(1) Public streets and alleys. Proposed public street and alley modifications shall satisfy the following criteria:

(a) Street right-of-way and paving widths shall be adequate to provide a traffic carrying and utility installation capacity related to the design of the overall street system, the function of the individual street, and the land uses served.

(b) Paving cross sections shall be designed to be adequate to provide acceptable drainage in conformity with the drainage plan for the PUD; to receive loading commensurate with anticipated traffic based on the design of the overall street system; and to have a maintenance level commensurate with that of facilities constructed to regular standards.

(2) Private streets and alleys. Proposed private street and alley modifications shall satisfy the criteria for public facility modifications listed above and the following:

(a) Private streets shall not be connected to an adjacent parcel, which is not part of the PUD in a manner that will circulate traffic into and through the private street system.

(b) The owner/applicant shall clearly demonstrate the existence and capabilities of a property or homeowners association to provide the ongoing and long-term maintenance of the private street and alley facilities that will not be provided by the city.

(c) The owner/applicant shall clearly demonstrate the accessibility of emergency and sanitation equipment to all proposed structures served by private streets and alleys.

(d) The owner/applicant shall clearly demonstrate the adequacy of on and off street parking for all property served by private streets and alleys.

(Ord. No. 401, §1, 1-19-88)

Cross reference--Chapter 25, Subdivision Regulations.

Sec. 24-205. General design and development guidelines.

(1) Densities. Proposed residential densities should be compatible with adjacent developed neighborhoods.

THE VILLAGE CITY CODE

(2) Amenities. Amenities should be considered as an important justification for development and city approval of a PUD. Where densities are to be increased to promote the economy of development, or where other methods of land use intensification are proposed, usable open space should be furnished along with provision for its permanent retention and continued maintenance. Sidewalks and pedestrian ways should be planned where it is necessary to provide for amenity and public safety.

(3) Streets:

(a) Street design should restrict through traffic from residential areas as much as possible.

(b) Encouragement should be given to design of short local streets serving limited areas, such as the residential cul-de-sac. Reduction of conventional minor street design widths should be considered appropriate on such streets, when they are designed with limited length and only one access point.

(c) Reduction of design widths on streets designed in a conventional pattern should not be approved.

(d) Development of a private street system should be considered appropriate under certain conditions where there is no through traffic. However, a private street system should not serve as a reason for reduction of minimum design and paving standards.

(e) On-street parking bays or other similar areas where vehicles must back into the traffic flow should not be approved on arterial or collector streets or any local street; provided, however, that certain cul-de-sac or small loop street designs may be considered as appropriate.

(f) Off-street parking. The off-street parking requirements set forth in Article IV of this chapter for residential and mixed-use Planned Unit Developments may be complied with by providing one (1) or more permanent, common, off-street facilities for all uses within the development, provided that the facility contains the requisite number of spaces for each use, and that the spaces provided for permanent residents shall be clearly designated and separated from spaces provided for employees, customers, and service. The total spaces provided shall not be less than the sum of the individual requirements and the spaces required for each use, and shall be under the

THE VILLAGE CITY CODE

ownership or permanent control of the owners of the use for which the spaces are required. (Ord. No. 639, §2, 03-17-2009)

(4) Relationship to abutting uses:

(a) The master development plan map should show graphically the treatments that will be employed to separate the PUD from abutting properties, including commitments to landscaping, screening, earth berms, retention ponds, drainage channelization, or similar techniques.

(b) It is appropriate to specifically establish areas with height limitations where a transition to more intense uses is proposed or where a higher intensity development is proposed to abut a lower intensity area.

(5) Mixed land use developments. Where a PUD proposes a mix of uses, which may generally be incompatible with a conventional development, the PUD master plan should specifically establish appropriate guidelines to assure a harmonious development.

(Ord. No. 401, §1, 1-19-88)

Cross reference--Chapter 25, Subdivision regulations, Sections 25-18, 25-19, 25-20 and 25-30.

Sec. 24-206. Approval of PUD.

(a) Within a reasonable time after holding the public hearing, the city council shall deny the request, approve the request, or approve the request with conditions.

State law reference--Similar provisions 11 O.S. §43-110.

(b) Upon final approval by the city council of the PUD master plan and the appropriate approval of rezoning, these elements shall become a part of the official zoning districts map.

(c) The approved PUD Master Plan shall control the use and development of the property, and all building permits and development requests shall be in accord with said plan until it is otherwise amended by the city council as provided herein. The developer shall furnish a reproducible copy of the approved master plan map for signature by the chairman of the planning and zoning commission, the mayor, and acknowledgment by the city

THE VILLAGE CITY CODE

clerk. The PUD master plan, including the signed map, shall be made a part of the permanent file and maintained by the city clerk.

(Ord, No. 401, §1-19-88; Ord. No. 505, §2, 9-20-94)

Sec. 24-207. Conditional approval of PUD.

(a) Reasonable conditions may be required by the city council in conjunction with the approval of a planned unit development. Conditions imposed shall:

(1) Be designed to take into consideration natural environment, the health, safety and welfare of the residents, and landowners immediately adjacent to the proposed land use or activity, and the community as a whole.

(2) Be related to the valid exercise of police power, and to the proposed use or activity.

(3) Be necessary to meet the intent and purpose of the zoning requirements; be related to the standards established by this article for the land use or activity under consideration; and be necessary to ensure compliance with those standards.

(b) The conditions imposed with respect to the approval of a land use or activity shall be stated in the record of the approval actions, and shall not be changed or amended except as provided herein.

Sec. 24-208. Plan changes.

Any deviation from the plans of a planned unit development submitted at the time of rezoning shall constitute a violation of the rezoning and changes in plans shall be resubmitted for review following the same procedure required in the original adoption of the plan. The city council shall maintain a record of the conditions, which are changed.

Sec. 24-209. Time limit.

The construction of planned unit development shall be started within one (1) year of the effective date of the approval of plans by the city council. Failure to begin the development within said one (1) year shall automatically void the development plans and the land shall revert to the same zoning classification which existed immediately preceding the approval of the PUD,

THE VILLAGE CITY CODE

provided however, that prior to the expiration of the development plans, the city council may extend the PUD in increments of one (1) year upon written request by the owner/developer.

(Ord. No. 401, §1, 1-19-88)

Sec. 24-210. Application fee.

The fee for filing a petition to obtain approval of a planned unit development shall be as established by resolution. The fee shall be payable upon receipt of the petition by the city clerk, such receipt to be a prior condition to any action on the petition by the city. The fee shall be nonrefundable, regardless of the disposition of the application.

Secs. 24-211--24-249. Reserved.

ARTICLE IV. OFF STREET PARKING AND LOADING

Sec. 24-250. Generally.

It is the intent of this division that adequate parking and loading facilities be provided off the street for each use of land within the city. Requirements are intended to be based on the demand created by each use. These requirements shall apply to all uses in all districts except as otherwise indicated.

(Code 1976, § 12-5-1; Ord. No. 461, §3, 11-5-91)

Cross reference--Chapter 25, Section 25-11(b).

THE VILLAGE CITY CODE

Sec. 24-252. Joint parking facilities.

Whenever two (2) or more uses are located together in a common building, shopping center, integrated building complex, or adjacent parcels, the parking requirements may be complied with by providing a permanent common parking facility, cooperatively established and operated, which contains the requisite number of spaces each commercial use within the common building, shopping center, or other integrated building complex as provided in Section 24-254 herein. Where different non-residential uses create staggered parking demand periods, shared parking calculations among collocated uses may be used to justify reducing the amount of required parking.

(Ord. No. 580 § 2, 1-7-03; Ord. No. 716 § 1 12-05-16)

(d) All sides of any off-street parking lot abutting a residential lot shall be enclosed with an opaque, ornamental fence or wall having a height of not less than six (6) feet. Such fence or wall shall be maintained in good condition.

(e) No off-street parking lot shall be permitted within five (5) feet of the property line of any abutting residential lot. In all other cases no setback shall be required; provided, however, that on any corner lot formed by two (2) intersecting streets no parking shall be permitted, and no wall, fence, sign,

structure or plant growth having a height in excess of two (2) feet above the elevation of the site where the wall, fence, sign, structure or plant is located shall be maintained in a triangle formed by measuring a distance of twenty-five (25) feet along said front and the points so established to form a triangle on the area of the lot adjacent to the street intersection.

(f) At least five (5%) percent of the total lot area, exclusive of the area of the adjacent rights-of-ways, of any off-street parking lot shall be landscaped with grass, shrubs, and ground cover.

(g) Driveways used for ingress and egress shall not exceed twenty-five (25) feet in width, exclusive of curb returns.

- (b) Variation from maximum parking requirements. The City Council may allow variations to exceed the maximum parking requirements if the developer or business owner requesting the variation shows that the permitted maximum number of spaces will not meet the normal day-to-day needs of a proposed use. Corporate standards or worst-case scenarios based on rare events are not grounds for granting such variations. The City Council may place conditions on any granted variation, such as requiring porous or textured pavement or additional landscaping.
- (c) On-Street Parking. Designated on-street parking spaces no more than 200 ft. from the main entrance of a building with a non-residential or multifamily residential use may be counted towards the required amount of parking spaces for that use. On-street parking being counted towards the required amount of parking spaces for any use must not encroach into single-family residential areas.
